GIT, GitLab, Linux,JEST, npm/yarn

WORK EXPERIENCE

SolidWay   **December 2023 — March 2024**
Frontend developer
- I refactored legacy components into reusable ones, improving code maintainability and scalability.
- I redesigned the entire project according to the client's new design to enhance user interface and functionality, resulting in increased engagement and satisfaction for both users and clients.
- I implemented new frontend features to complement and utilize functionality introduced in the backend, improving overall project capabilities.

Upwork   **January 2023 — August 2023**
Frontend developer
- I developed and implemented new features using Next.js, GraphQL, Apollo Client, Handsontable, and Material-UI. These enhancements significantly improved application functionality and user experience.
- I used GraphQL and Apollo Client to efficiently retrieve data from APIs, resulting in optimized application performance.
- I implemented Handsontable to create interactive and editable tables, improving the user experience by providing seamless data manipulation capabilities.
- I designed and developed user interfaces using Material-UI, delivering a modern and intuitive user experience

EDUCATION

Kherson National Technical University   **September 2020 - 2024**
Computer Engineering
